

ROLO – RL36

Retrofit LED Pinspot Module

The ROLO-RL36 is a modern PAR36 size “rainlight” style LED retrofit module from Luxium Lighting. This pinspot lamp provides high-quality soft white LED lighting with a uniform very-narrow spot beam and full-range dimming control. It’s made for easy installation into PAR36 fixtures.

Precise lighting is key to creating pleasing effects. The RL36 consumes just 12W of power and can be dimmed with separate potentiometer or line control. Using a single high-performance 3200K LED the ROLO-RL36 excels at providing powerful uniform lighting with simple operation. With an extremely efficient LED and custom optical design by Luxium the ROLO creates a crisp edge beam with almost no stray light.

Made in the USA the RL36 is easy to install, lightweight and built to last. It’s specially designed to replace old 30W 4515 incandescent bulbs and the ROLO gives better performance while using less power. Now you can create a professional LED pinspot setup for many kinds of events and facilities with amazing results.
